Eye pad (single use)	4
Access to 20 minutes of clean running water or (if this is not available) hydro gel (3.5 gm sachets)	5
Instant ice pack (e.g. for treatment of soft tissue injuries and some stings)	1

Medication, including analgesics such as paracetamol and aspirin, should not be included in first aid kits because of their potential to cause adverse health effects in some people including asthmatics, pregnant women and people with medical conditions. The supply of these medications may also be controlled by drugs and poisons laws. Workers requiring prescribed and over-the-counter medications should carry their own medication for their personal use as necessary. Some types of workplaces may require additional items to treat specific types of injuries or illnesses.

Some types of workplaces may require additional items to treat specific types of injuries or illnesses.
